

EUROPEAN
CANCER
ORGANISATION

**Are you a young doctor
who treats and cares for
patients with prostate cancer ?**

The European Association of Urology (EAU), the European CanCer Organisation (ECCO) and the European Oncology Nursing Society (EONS) are conducting a multi-disciplinary project to develop an education package for European clinical and health care professionals who treat and care for patients with prostate cancer. As part of the project, questionnaire surveys are being carried out amongst all relevant health care groups in seven European countries: Denmark, France, Ireland, Netherlands, Spain, Turkey and the UK .

If *you* are a young doctor who treats and cares for patients with prostate cancer, your views and opinions on current practice and training needs of doctors are important to us. The link below will take you directly to an on-line introduction and questionnaire aimed specifically at doctors working in the field. By completing the survey you will be contributing to this vital work in education for prostate cancer care and practice across Europe.

The survey is completed and submitted entirely on line, all responses will be anonymous and confidential, and it should take less than 20 minutes of your time. It is available from 20th January for five weeks, and we would urge you to complete the survey as soon as you can.

Thank you for your response,
your involvement and effort is very much appreciated and valued.

For and on behalf of:
European Association of Urology
European CanCer Organisation
European Oncology Nursing Association.
